WatchGuard®

Firebox M495

Delivers fast, secure connectivity with SD-WAN, high availability (HA), and scalable BOVPN capacity for up to 800 sites.

High-Performance Protection for Distributed Enterprises

The Firebox M495 delivers 6.3 Gbps UTM throughput, 3.5 Gbps HTTPS inspection, and supports up to 500 users.
Ideal for larger branch sites or midsize headquarters, it balances strong performance with comprehensive security services.

WatchGuard Network Security has been my go to solution for firewalls and WAN security for many years. I like the scalability of the devices and the licensing options. I appreciate the different licensing options for the solutions including the different add on services for increased security offerings like botnet scanning, IPS, gateway a/v, etc.

Strong Security at Every Layer

Uniquely architected to be the industry's smartest, fastest, and most effective network security products, WatchGuard solutions deliver in-depth defenses again advanced malware, ransomware, botnets, trojans, viruses, drive-by downloads, data loss, phishing, and much more.

[1] Throughput rates are determined using multiple flows through multiple ports and will vary depending on the environment and configuration. Max firewall throughput tested via direct connection using 1518-byte UDP frames based on RFC 2544 methodology. All testing performed on Fireware version 2025.1.

[2] UTM throughput is measured using HTTP traffic with AV, IPS, and Application Control enabled, and does not account for all security services available on the appliance.
